TOEFL ITP
Cuaderno del estudiante

Preparación intensiva: 5 sesiones de 2 horas

Cómo usar este cuaderno. Tráelo a cada sesión. Haz la tarea con reloj y de una sola vez. Anota cada error en tu bitácora el mismo día.

El examen tiene tres secciones de opción múltiple:

Sección	Preguntas	Tiempo
Listening	50	35 min
Structure and Written Expression	40	25 min
Reading	50	55 min

Las respuestas incorrectas no restan puntos: nunca dejes una pregunta en blanco.

Contenido

1. Sesión 1 — Structure and Written Expression
2. Sesión 2 — Listening
3. Sesión 3 — Reading
4. Sesión 4 — Simulacro
5. Sesión 5 — Repaso final
6. Bitácora y hoja de análisis

Sesión 1 — Structure and Written Expression

Meta: resolver 40 reactivos en 25 minutos (unos 37 segundos por reactivo).

Structure: completar la oración

1. Marca cada verbo conjugado y busca su sujeto.
2. Cuenta cláusulas y conectores: conectores = cláusulas – 1 (and, but, because, although, which, that, when…).
3. Descarta las opciones que dejan una cláusula sin sujeto o sin verbo, o que agregan un verbo sin conector.

Seis patrones frecuentes

Un ejemplo de cada patrón; los resolvemos juntos en clase.

1. Falta el verbo principal
In the late nineteenth century, _____ the fastest means of long-distance communication.

(A) the telegraph
(B) the telegraph was
(C) when the telegraph was
(D) the telegraph being

2. Conector con cláusula o preposición con sustantivo

_____ the Sahara receives very little rain, it supports a surprising variety of plant life.

(A) Despite

(B) Although

(C) Because of

(D) Even

3. Cláusula reducida

The Erie Canal, _____ in 1825, connected the Great Lakes to the Atlantic Ocean.

(A) was completed

(B) completing

(C) which completed

(D) completed

4. Inversión

Not until the invention of the microscope _____ able to observe individual cells.

(A) scientists were

(B) were scientists

(C) scientists being

(D) did scientists

5. Comparativo doble
The higher the altitude, _____ the air pressure.

(A) the lower
(B) lower
(C) the lowest
(D) it is lower

6. Cláusula sustantiva como sujeto
_____ honeybees are disappearing in some regions is a question that worries farmers.

(A) Why
(B) Because
(C) Since
(D) It is why

Written Expression: encontrar el error

Lee la oración completa y revisa cada parte subrayada contra esta lista. Casi todos los errores son de estos 10 tipos:

> **1. Concordancia sujeto-verbo**
> the list of names are → is

> **2. Forma de palabra**
> a rapidly increase → rapid

> **3. Paralelismo**
> reading, writing, and to speak → speaking

4. Forma verbal
will goes → go; has went → gone

5. Singular, plural y contables
less books → fewer; one of the reason → reasons

6. Pronombres
the company changed their logo → its

7. Comparativos y superlativos
more taller → taller; the most cheap → the cheapest

8. Artículos y determinantes
a best option → the best option

9. Preposiciones y palabras parecidas
interested on → interested in; lay / lie; make / do

10. Palabras de más
return back → return

Ejemplos

Los resolvemos juntos en clase.

The number$_{A}$ of species in tropical forests are$_{B}$ far greater$_{C}$ than in$_{D}$ temperate forests.

Honeybees communicate the location of food sources$_{A}$ through a complexity$_{B}$ series of movements$_{C}$ known as$_{D}$ the waggle dance.

Early settlers in the region survived by hunting$_{A}$ deer, gathering$_{B}$ wild plants, and they fished$_{C}$ in nearby$_{D}$ rivers.

Mercury is$_{A}$ the only metal that can remains$_{B}$ liquid at room temperature, which$_{C}$ makes it useful in certain$_{D}$ scientific instruments.

The giant panda spends most of their$_{A}$ day eating$_{B}$ bamboo, which$_{C}$ provides little$_{D}$ nutrition.

Saturn's rings are more wider$_{A}$ than the planet itself$_{B}$ and are made mainly$_{C}$ of ice particles$_{D}$.

Práctica en clase: 40 reactivos

25 minutos

Structure

Directions: Choose the one word or phrase that best completes the sentence.

1. _____ of the Earth's surface is covered by water.

(A) About seventy-one percent

(B) It is about seventy-one percent

(C) Because about seventy-one percent

(D) About seventy-one percent that

2. Edward Jenner, _____, developed the first vaccine against smallpox in 1796.

(A) was an English physician

(B) he was an English physician

(C) an English physician he was

(D) an English physician

3. Glaciers form _____ more snow falls in winter than melts in summer.

(A) where it

(B) where is

(C) in where

(D) where

4. _____ the human brain accounts for only about 2 percent of body weight, it uses roughly 20 percent of the body's energy.

(A) Despite

(B) Even

(C) Although

(D) In spite

5. Not only _____ the first woman to fly solo across the Atlantic Ocean, but she also set several other aviation records.

(A) Amelia Earhart was

(B) was Amelia Earhart

(C) Amelia Earhart being

(D) did Amelia Earhart

6. The Rocky Mountains, _____ more than 4,800 kilometers from New Mexico into Canada, form part of the Continental Divide.

(A) stretch

(B) stretching

(C) are stretching

(D) they stretch

7. Scientists still do not fully understand _____ birds are able to navigate across thousands of kilometers.

(A) how do

(B) that how

(C) how

(D) the way how

8. The more carbon dioxide the oceans absorb, _____.

(A) they become more acidic

(B) more acidic they become

(C) the more acidic they become

(D) becoming more acidic

9. Only after the Bessemer process was introduced in 1856 _____ produced cheaply on a large scale.

(A) steel was

(B) could steel be

(C) steel could be

(D) did steel

10. _____ in 1869, the first transcontinental railroad reduced travel time across the United States from months to about a week.

(A) Completed

(B) It was completed

(C) Completing

(D) When completing

11. Volcanic soil is extremely fertile, _____ farmers often settle near active volcanoes despite the danger.

(A) which
(B) that
(C) so
(D) for which

12. The octopus has three hearts, two of _____ pump blood through the gills.

(A) them
(B) which
(C) that
(D) its

13. It was not until 1928 _____ Alexander Fleming discovered penicillin.

(A) when
(B) which
(C) and
(D) that

14. Many desert plants have small, waxy leaves, _____ water loss through evaporation.

(A) reduce
(B) they reduce
(C) are reducing
(D) which reduce

15. _____ Mars once had liquid water on its surface is suggested by the presence of ancient riverbeds.

(A) That

(B) It is that

(C) Because

(D) Since

Written Expression

Directions: Identify the one underlined word or phrase that must be changed for the sentence to be correct.

16. The discovery$_{A}$ of gold in California in 1848 were$_{B}$ responsible for a rapid$_{C}$ increase in the region's$_{D}$ population.

17. Coral reefs are extremely vulnerable$_{A}$ to changes$_{B}$ in water temperature, and even$_{C}$ a small increase can cause seriously$_{D}$ damage.

18. Benjamin Franklin was a printer, a scientist, and he served as$_{A}$ a diplomat who$_{B}$ helped negotiate$_{C}$ the treaty that$_{D}$ ended the American Revolution.

19. Over many$_{A}$ centuries, successive$_{B}$ Chinese dynasties build$_{C}$ and rebuilt the Great Wall to protect$_{D}$ their territory against invasions.

20. Scientists have described about$_{A}$ 11,000 species of birds, but far$_{B}$ less$_{C}$ species of mammals have been$_{D}$ identified.

21. The honeybee relies$_{A}$ on a$_{B}$ highly developed sense of smell to locate$_{C}$ flowers and to communicate with other members of their$_{D}$ colony.

22. The blue whale, which can reach 30 meters in length$_{A}$, is believed$_{B}$ to be the$_{C}$ most large$_{D}$ animal that has ever lived.

23. Marie Curie was a$_{A}$ first person to win Nobel Prizes in two$_{B}$ different scientific$_{C}$ fields$_{D}$.

24. During the Civil War, supplies of Southern cotton were$_{A}$ cut off, and as a result$_{B}$ its price raised$_{C}$ sharply$_{D}$.

25. One of the most important inventions$_{A}$ of the fifteenth century were$_{B}$ the printing press, which made$_{C}$ books widely$_{D}$ available.

26. The Amazon rainforest produces a significantly$_{A}$ amount of the world's oxygen, but it also consumes$_{B}$ much$_{C}$ of it through$_{D}$ respiration.

27. Students in the program learn$_{A}$ to design experiments, analyze data, and writing$_{B}$ clear$_{C}$ research reports$_{D}$.

28. By the end of the nineteenth century, many American cities had$_A$ began$_B$ to use electric streetlights instead of$_C$ gas lamps, which$_D$ were less safe.

29. Since 1995, astronomers have discovered$_A$ thousands of planets that orbit$_B$ stars other than$_C$ the Sun, and a large amount$_D$ of them may be rocky like Earth.

30. Although the koala looks like a bear, it$_A$ is actually a marsupial, and it$_B$ carries their$_C$ young in a$_D$ pouch.

31. Lead is much$_A$ softer than iron, but it$_B$ is more heavier$_C$, which makes it useful$_D$ for blocking radiation.

32. Venus rotates in the$_A$ opposite direction from the most$_B$ planets, so on Venus the Sun rises$_C$ in the west and sets$_D$ in the east.

33. The two hemispheres of the brain are alike$_A$ in appearance$_B$, but they differ to$_C$ the functions they control$_D$.

34. The data collected by the Hubble Space Telescope have$_A$ helped astronomers estimate$_B$ the age of the universe and understand$_C$ how galaxies forms$_D$.

35. The develop$_{A}$ of agriculture allowed early humans to settle$_{B}$ in permanent$_{C}$ villages rather than$_{D}$ follow herds of animals.

36. After coffee cherries are pick$_{A}$ by hand, the beans are dried$_{B}$, sorted$_{C}$, and shipped to markets$_{D}$ around the world.

37. Each of$_{A}$ the student$_{B}$ in the laboratory must record the results carefully$_{C}$ in a$_{D}$ notebook.

38. The Nile was important to ancient Egypt not only$_{A}$ as a source of water but also$_{B}$ for providing$_{C}$ a means of transportation$_{D}$.

39. Most earthquakes occur$_{A}$ along the$_{B}$ edges of tectonic plates, where$_{C}$ stress builds up among$_{D}$ two plates.

40. There is$_{A}$ many theories about why$_{B}$ the ancient Maya abandoned$_{C}$ their cities, but none has been$_{D}$ proven.

Con reloj y de una sola vez. Tu profesor te da la clave en la siguiente clase; entonces anota cada error en tu bitácora.

Structure

1. Antarctica, _____ the coldest continent, is also technically the largest desert in the world.

(A) is
(B) which it is
(C) it is
(D) which is

2. _____ a hurricane reaches land, it begins to lose strength because it is no longer over warm water.

(A) Once
(B) Due to
(C) During
(D) Since then

3. Rarely _____ longer than thirteen years in the wild.

(A) gray wolves live
(B) do gray wolves live
(C) gray wolves do live
(D) living gray wolves

4. The Hope Diamond, _____ at the Smithsonian Institution, is one of the most famous gems in the world.

(A) now displayed

(B) is now displayed

(C) it is now displayed

(D) now displaying

5. Bats use echolocation _____ insects in complete darkness.

(A) find

(B) for find

(C) that find

(D) to find

6. _____ that the Earth revolves around the Sun was first proposed in detail by Copernicus.

(A) It

(B) What

(C) The idea

(D) Because

7. So hot _____ that lead would melt on its surface.

(A) Venus is

(B) is Venus

(C) Venus being

(D) is Venus's

8. The Grand Canyon was carved by the Colorado River over millions of years, _____ layers of rock nearly two billion years old.

(A) it exposed

(B) exposed

(C) exposing

(D) which exposing

Written Expression

9. The giraffe's long neck allow$_{A}$ it to reach$_{B}$ leaves that$_{C}$ other animals cannot$_{D}$.

10. Rice is the main$_{A}$ food for more than$_{B}$ half of the world's population, especially$_{C}$ in Asia, where it has been grow$_{D}$ for thousands of years.

11. The museum's new exhibit is both$_{A}$ educational and$_{B}$ it entertains$_{C}$ for visitors of all ages$_{D}$.

12. Penguins are excellent$_{A}$ swimmers, but they$_{B}$ cannot fly because$_{C}$ their wings have evolved into flipper$_{D}$.

13. The hummingbird is the only bird that can$_{A}$ fly backward, and during flight its$_{B}$ heart beat$_{C}$ more than 1,000 times per$_{D}$ minute.

14. The Wright brothers made the$_{A}$ first powered$_{B}$ flight in 1903, and their$_{C}$ airplane stayed in the air for only twelve second$_{D}$.

15. Unlike$_{A}$ most metals, mercury is liquid at room temperature, and it was once wide$_{B}$ used in thermometers because$_{C}$ it expands evenly$_{D}$ when heated.

16. The Sahara is almost$_{A}$ as$_{B}$ large than$_{C}$ the entire$_{D}$ United States.

17. Thomas Edison received$_{A}$ more then$_{B}$ 1,000 patents, including$_{C}$ those$_{D}$ for the phonograph and an improved light bulb.

18. The colonial economy depended heavily of$_{A}$ agriculture, fishing$_{B}$, and trade$_{C}$ with Europe$_{D}$.

19. A tsunami is a series of ocean$_{A}$ waves usually causing$_{B}$ by an earthquake or a volcanic eruption under$_{C}$ the$_{D}$ sea.

20. Ancient Roman engineers built aqueducts that were beauty$_{A}$, durable$_{B}$, and efficient$_{C}$, and some are still$_{D}$ in use today.

Sesión 2 — Listening

Meta: reconocer las 8 trampas de los diálogos cortos y anticipar las preguntas de conversaciones y charlas.

En el examen escuchas todo una sola vez. Solo ves las opciones; la pregunta se escucha. Normalmente no se permite tomar notas.

Part A: diálogos cortos

La respuesta casi siempre depende de lo que dice la segunda persona. La opción correcta dice lo mismo con otras palabras; la que repite palabras o sonidos del diálogo suele ser trampa.

> **Palabra o sonido repetido**
> Se oye: *The test was a breeze.*
> Significa: Fue fácil (no habla de viento).

> **Negación**
> Se oye: *It's not unusual for him to be late.*
> Significa: Suele llegar tarde.

> **Sugerencia**
> Se oye: *You might want to talk to your advisor.*
> Significa: Le recomienda hablar con su asesor.

Acuerdo
Se oye: *You can say that again.*
Significa: Está totalmente de acuerdo.

Condicional irreal
Se oye: *If I had known about the sale, I would have gone.*
Significa: No sabía de la venta y no fue.

Deseo
Se oye: *I wish I could go to the conference.*
Significa: No puede ir.

Sorpresa
Se oye: *You're taking physics? I thought you hated science!*
Significa: Creía que no le gustaba la ciencia.

Expresión idiomática
Se oye: *hit the books; take a rain check; up in the air*
Significa: Estudiar; dejarlo para otra ocasión; sin decidir.

Parts B y C: conversaciones y charlas

1. Antes del audio, lee rápido las opciones de las cuatro preguntas: anticipan el tema y los datos que hay que buscar.
2. La primera pregunta suele ser sobre la idea principal; escucha con atención las primeras

oraciones.

3. Las respuestas aparecen en el mismo orden que la información en el audio.
4. Pon atención a fechas, números, causas y a palabras como but, however o actually.
5. Las últimas oraciones suelen responder qué pasará después.

Práctica en clase: opciones

Part A

Directions: You will hear short conversations between two people. After each conversation, you will hear a question. Choose the best answer.

1.

(A) The line is shorter early in the day.

(B) He couldn't find the books he needed.

(C) The bookstore opens late.

(D) The woman should wait until tomorrow.

2.

(A) She enjoyed the exam.

(B) She found the exam difficult.

(C) She finished the exam early.

(D) She brought food to the exam.

3.

(A) He will attend the lecture.

(B) He has already finished his lab report.

(C) He is not going to the lecture.

(D) The lecture was rescheduled.

4.

(A) Calling Sarah again.

(B) Waiting until next week.

(C) Asking a friend about Sarah.

(D) Writing a message to Sarah.

5.

(A) The weather was too bad to go out.

(B) He forgot about the meeting.

(C) He was working at home.

(D) He was feeling sick.

6.

(A) The library will probably be open.

(B) The library is rarely open on Sunday.

(C) She doesn't know the library's schedule.

(D) The library closed last weekend.

7.

(A) She took good notes.

(B) She missed the midterm.

(C) She did not take notes at the beginning of the course.

(D) She will lend the man her notes.

8.

(A) The man should bring snacks.

(B) The study group was canceled.

(C) Tom is not coming.

(D) Tom will provide food.

9.

(A) Calling the professor.

(B) Stopping work for now.

(C) Working through the night.

(D) Eating lunch together.

10.

(A) Jenna had not applied to the program.

(B) Jenna had been rejected.

(C) Jenna was already in graduate school.

(D) Jenna had changed programs.

11.

(A) The woman should work more hours.

(B) Five courses are required.

(C) The woman may have too much to do.

(D) He will also take five courses.

12.

(A) The man can sit there.

(B) The seat is not available.

(C) Her friend has left for the day.

(D) She will move to another seat.

13.

(A) He has finished the novel.

(B) He has read half of the novel.

(C) He has not begun reading the novel.

(D) He left the novel in class.

14.

(A) She agrees with the man.

(B) She hasn't seen the gym yet.

(C) She will tell her friends about the gym.

(D) She prefers the old gym.

15.

(A) He expected the hypothesis to be correct.

(B) The bottle has no label.

(C) They need a new hypothesis.

(D) He knows why the results were different.

Parts B and C

Directions: You will hear a longer conversation and two talks. After each one, you will hear several questions. Choose the best answer.

16.

(A) He has not chosen a project topic.

(B) He does not have transportation.

(C) He has to work on Saturday.

(D) He does not like hiking.

17.

(A) In the man's car

(B) By bus

(C) In vans rented by the department

(D) In the professor's car

18.

(A) Changes in the river's path

(B) The age of the rock layers

(C) Tools used to collect samples

(D) The weather in the canyon

19.

(A) Buy hiking boots

(B) Take his car to the mechanic

(C) Choose a project topic

(D) Contact the professor

20.

(A) How butterflies choose their food

(B) The migration of the monarch butterfly

(C) Forests in central Mexico

(D) The life cycle of insects in winter

21.

(A) It lives much longer than other generations.

(B) It does not need to eat.

(C) It travels at night.

(D) It returns to Canada in the spring.

22.

(A) Following older butterflies

(B) The smell of fir trees

(C) Rivers and mountains

(D) The position of the sun

23.

(A) Cold winters in Mexico

(B) Fewer fir trees in Canada

(C) The loss of the plant their caterpillars eat

(D) Changes in the Earth's magnetic field

24.

(A) The origin of standard time zones

(B) How railroads were built across the United States

(C) Differences between Boston and New York

(D) How clocks were invented

25.

(A) By following railroad schedules

(B) By the position of the sun

(C) By a law passed by Congress

(D) By the time in New York

26.

(A) To sell more tickets

(B) To follow a federal law

(C) To reduce confusion and the risk of accidents

(D) To make trains travel faster

27.

(A) It opposed the time zones.

(B) It created the first time zones.

(C) It paid the railroads to reset their clocks.

(D) It made time zones official long after the railroads did.

Tarea

- Diario, 20 minutos: Listening del material oficial que te indique tu profesor. Un día Part A, el siguiente Parts B y C, sin pausar el audio.
- Diario, 15 minutos: una conferencia corta o un podcast de divulgación en inglés, sin subtítulos. Al final, escribe la idea principal en una línea.
- Anota en la bitácora cada error, con el tipo de trampa.

Sesión 3 — Reading

Meta: resolver un texto de 10 preguntas en 11 minutos, el ritmo del examen (50 preguntas en 55 minutos).

Método general. Lee el texto completo en 2 o 3 minutos para saber de qué trata cada párrafo. Después busca cada respuesta en el párrafo que indica la pregunta. Si una pregunta toma más de un minuto, marca una opción y sigue.

Tipos de pregunta

Idea principal
What does the passage mainly discuss?
Lee la primera oración de cada párrafo; descarta opciones demasiado específicas o demasiado amplias.

Detalle
According to paragraph 2, …
Busca en el texto una palabra clave de la pregunta y lee esa oración completa.

Vocabulario
The word X is closest in meaning to
Sustituye cada opción en la oración; la correcta conserva el sentido.

Referencia
The word "it" refers to
Busca el sustantivo anterior que concuerda en número y en sentido.

Inferencia
It can be inferred that …
No está escrito literal, pero se deduce de una oración concreta; descarta lo que exige suponer de más.

NOT / EXCEPT
Which is NOT mentioned?
Localiza las tres opciones que sí aparecen; la que sobra es la respuesta.

Propósito
Why does the author mention X?
Lee la oración anterior; X casi siempre ilustra esa idea.

Organización
Which best describes the organization?
Fíjate en cómo empieza cada párrafo.

Vocabulario y referencia son las más rápidas: si falta tiempo, respóndelas primero. En el examen real las preguntas citan números de línea; aquí citan párrafos.

Texto 1 (guiado): The Pony Express

[1] In the spring of 1860, a new mail service promised to carry letters across the western half of the United States faster than ever before. The Pony Express, as it was called, connected St. Joseph, Missouri, with Sacramento, California, a distance of roughly 3,000 kilometers. Before it began, mail traveling by stagecoach or by ship could take three weeks or more to reach California. The Pony Express reduced that time to about ten days.

[2] The system depended on speed and organization rather than on new technology. Along the route, the company built a chain of relay stations, spaced roughly 15 to 25 kilometers apart. At each station, a rider exchanged his tired horse for a fresh one in about two minutes and continued on his way. After covering between 120 and 160 kilometers, he handed the mail pouch to the next rider, who carried it through the night if necessary. To keep the horses fast, riders had to be small and light, and the company preferred young men.

[3] The work was dangerous. Riders crossed deserts, mountains, and rivers in every kind of weather, often alone. Yet despite the risks, the service lost very little mail. Its reliability made it famous, and stories about its riders became part of the legend of the American West.

[4] Fame, however, did not bring financial success. Sending a letter by Pony Express was expensive, so relatively few people used it, and the company lost money from the start. More importantly, a faster technology was already on its way. In October 1861, workers completed the first telegraph line across the continent, which could transmit a message from coast to coast in minutes. Only two days later, the Pony Express announced that it would end its service. It had operated for about eighteen months.

1. What does the passage mainly discuss?

(A) The dangers faced by riders in the American West

(B) The history and end of an early mail service

(C) The invention of the telegraph

(D) Mail delivery by stagecoach and ship

2. According to paragraph 1, how long did mail take to reach California before the Pony Express?

(A) About ten days

(B) Less than a week

(C) Three weeks or more

(D) Eighteen months

3. The word "depended" in paragraph 2 is closest in meaning to

(A) relied

(B) insisted

(C) improved

(D) waited

4. The word "he" in the sentence "After covering between 120 and 160 kilometers, he handed the mail pouch…" (paragraph 2) refers to

(A) the next rider

(B) the company

(C) a fresh horse

(D) a rider

5. According to paragraph 2, why did the company prefer small and light riders?

(A) They were cheaper to employ.

(B) They could carry more mail.

(C) They allowed the horses to run faster.

(D) They were less afraid of danger.

6. It can be inferred from paragraph 2 that the relay stations were important because they

(A) provided riders with fresh horses

(B) sold tickets to passengers

(C) sent messages by telegraph

(D) stored mail for several days

7. Which of the following is NOT mentioned in paragraph 3 as a difficulty for riders?

(A) Bad weather

(B) Crossing rivers

(C) Riding alone

(D) Attacks by animals

8. The word "reliability" in paragraph 3 is closest in meaning to

(A) speed

(B) cost

(C) dependability

(D) popularity

9. According to paragraph 4, why did the Pony Express lose money?

(A) Its riders demanded high wages.

(B) Its service was too expensive for most people.

(C) It lost a large amount of mail.

(D) The government stopped paying it.

10. What can be inferred about the telegraph from paragraph 4?

(A) It was cheaper than the stagecoach.

(B) It made the Pony Express unnecessary.

(C) It was built by the Pony Express company.

(D) It took eighteen months to complete.

Texto 2 (11 minutos): Light in the Deep Sea

11 minutos

[1] Sunlight disappears quickly as it passes through seawater. Below about 200 meters, the ocean grows dim, and below 1,000 meters it is completely dark. Yet this darkness is not empty of light. Many of the animals that live there can produce their own light, a process known as bioluminescence. In some surveys of the deep sea, roughly three-quarters of the animals observed were capable of glowing.

[2] Bioluminescence is the result of a chemical reaction. Inside special cells, a compound called luciferin combines with oxygen with the help of an enzyme, releasing energy in the form of light. Because this reaction produces almost no heat, it is sometimes described as "cold light." Most marine bioluminescence is blue or blue-green. These colors travel farthest through water, and many deep-sea animals cannot see red light at all.

[3] Animals use their light in several ways. The anglerfish, for example, has a glowing lure that hangs in front of its mouth. Small fish that approach the light, mistaking it for food, are quickly swallowed. Other animals use light for defense. Certain shrimp release a cloud of glowing fluid when they are attacked, which may confuse a predator long enough for the shrimp to escape.

[4] One of the most surprising uses of light is camouflage. In the upper part of the deep sea, a small amount of sunlight still filters down from above. Predators looking up can see the dark shapes of animals against this faint light. To avoid being seen, some fish and squid produce light on their undersides that matches the light coming from above. This strategy, called counterillumination, makes them nearly invisible from below.

[5] Scientists are still discovering new examples of bioluminescence, and many questions remain. Because the deep sea is difficult and expensive to explore, much of the behavior of its glowing inhabitants has never been observed directly.

11. What is the main topic of the passage?

(A) How sunlight travels through seawater

(B) The production and uses of light by deep-sea animals

(C) Why the deep sea is difficult to explore

(D) The anglerfish and its hunting methods

12. According to paragraph 1, at what depth does the ocean become completely dark?

(A) Below 200 meters

(B) Between 200 and 1,000 meters

(C) Below 1,000 meters

(D) Only at the ocean floor

13. The word "dim" in paragraph 1 is closest in meaning to

(A) poorly lit

(B) crowded

(C) cold

(D) quiet

14. According to paragraph 2, why is bioluminescence described as "cold light"?

(A) It occurs only in cold water.

(B) It requires no oxygen.

(C) It is always blue.

(D) It produces very little heat.

15. According to paragraph 2, why is most marine bioluminescence blue or blue-green?

(A) These colors travel farthest in water.

(B) Luciferin is blue.

(C) Predators are attracted to these colors.

(D) Red light produces too much heat.

16. The word "it" in the phrase "mistaking it for food" (paragraph 3) refers to

(A) the anglerfish

(B) the mouth

(C) the light

(D) food

17. The author mentions shrimp in paragraph 3 as an example of an animal that

(A) uses light to attract food

(B) uses light to escape from predators

(C) cannot see blue light

(D) lives near the surface

18. Which of the following is NOT mentioned in the passage as a use of bioluminescence?

(A) Attracting prey

(B) Defense

(C) Camouflage

(D) Finding a mate

19. It can be inferred from paragraphs 1 and 4 that counterillumination would be LEAST useful

(A) near the surface on a sunny day

(B) in water deeper than 1,000 meters

(C) for fish that live in the upper part of the deep sea

(D) for squid hunted by predators below them

20. What does the author imply in paragraph 5?

(A) Bioluminescence is no longer studied.

(B) Scientists have explained all forms of bioluminescence.

(C) Much remains unknown about deep-sea animals.

(D) Exploring the deep sea is becoming cheaper.

Texto 3 (11 minutos): The Birth of Impressionism

11 minutos

[1] In the nineteenth century, the most important event in the French art world was the Salon, an official exhibition held in Paris. A jury of established artists decided which works would be shown, and they generally preferred large, carefully finished paintings of historical, religious, or mythological subjects. Artists whose work was rejected by the Salon found it difficult to attract buyers or build a reputation.

[2] During the 1860s, a group of painters that included Claude Monet, Pierre-Auguste Renoir, and Camille Pissarro grew frustrated with these standards. Rather than painting scenes from the distant past, they wanted to show the world around them: city streets, gardens, rivers, and ordinary people at leisure. Above all, they were interested in

light and in the way it changes the appearance of objects from one hour to the next.

[3] To capture these changing effects, the painters often worked outdoors instead of in a studio. This practice had become much easier after the invention of paint in metal tubes in the 1840s. Before then, oil paint was usually stored in pig bladders that burst easily and dried out quickly, which made painting outside impractical. Working quickly to record a passing moment, the painters used short, visible brushstrokes and bright, unmixed colors. To many viewers at the time, the results looked unfinished.

[4] In 1874, tired of rejection, the group organized its own exhibition. One of the works shown was Monet's Impression, Sunrise, a view of a harbor in morning fog. A critic who disliked the exhibition used the title of this painting to mock the entire group, calling its members "Impressionists." The painters soon adopted the name themselves.

[5] The 1874 exhibition was not a commercial success, and critics continued to attack the new style for years. Eventually, however, Impressionism gained wide acceptance, and it influenced many of the movements that followed.

21. What is the passage mainly about?

(A) The life of Claude Monet

(B) How a new style of painting began

(C) The rules of the French Salon

(D) The invention of paint tubes

22. According to paragraph 1, what kind of paintings did the Salon jury prefer?

(A) Small outdoor scenes

(B) Portraits of ordinary people

(C) Large works on historical or religious themes

(D) Paintings with bright, unmixed colors

23. The word "established" in paragraph 1 is closest in meaning to

(A) recognized

(B) young

(C) wealthy

(D) foreign

24. According to paragraph 2, the painters were especially interested in

(A) the effects of light

(B) mythological subjects

(C) life in ancient Rome

(D) religious ceremonies

25. The word "it" in the phrase "the way it changes the appearance of objects" (paragraph 2) refers to

(A) the world

(B) the past

(C) an hour

(D) light

26. Why does the author mention paint in metal tubes in paragraph 3?

(A) To describe a new type of brush

(B) To show that the painters were wealthy

(C) To explain how painting outdoors became practical

(D) To compare French and English artists

27. The word "impractical" in paragraph 3 is closest in meaning to

(A) unpopular

(B) difficult to carry out

(C) illegal

(D) expensive

28. Which of the following is NOT mentioned as a feature of the new painting style?

(A) Visible brushstrokes

(B) Bright colors

(C) Scenes of everyday life

(D) Large historical scenes

29. It can be inferred from paragraph 4 that the critic who named the group

(A) intended the name as an insult

(B) was a friend of Monet

(C) organized the 1874 exhibition

(D) painted Impression, Sunrise

30. Which of the following best describes the organization of the passage?

(A) A problem is presented, and several solutions are compared.

(B) Events are described in roughly chronological order.

(C) Two artists are compared and contrasted.

(D) A theory is stated and then rejected.

Tarea

- Dos textos del material oficial que te indique tu profesor, en 22 minutos, con reloj y de una sola vez.
- Diario, 15 minutos: un artículo de divulgación científica o histórica en inglés. Al final, escribe la idea principal en una línea.
- Anota en la bitácora cada error, con el tipo de pregunta.

Sesión 4 — Simulacro

Un examen oficial completo, en condiciones reales. Es la mejor estimación de tu puntaje antes del examen.

- Duración: 115 minutos sin pausas. Listening (35 min), Structure and Written Expression (25 min) y Reading (55 min).
- Sin celular, diccionario ni notas. Todas las respuestas van en la hoja de respuestas.
- Trae lápiz y goma.

Cómo se calcula el puntaje

Tus aciertos de cada sección se convierten con la tabla oficial a un puntaje de 31 a 68 (Reading, de 31 a 67). El total se calcula así:

$$\textbf{Total} = (L + S + R) \times 10 \div 3$$

Ejemplo: 50 + 52 + 51 = 153; 153 × 10 ÷ 3 = 510.

Después del simulacro: llena tu hoja de análisis antes de la Sesión 5.

Sesión 5 — Repaso final

Set mixto: 12 reactivos

8 minutos

Structure

Directions: Choose the one word or phrase that best completes the sentence.

1. _____ the cheetah can reach speeds of over 100 kilometers per hour, it can keep that speed for only a short distance.

(A) Even though
(B) Despite
(C) Because of
(D) However

2. The Dead Sea is so salty _____ almost no plants or animals can live in it.

(A) and
(B) because
(C) as
(D) that

3. _____ by the Spanish in the sixteenth century, the potato eventually became a staple food across the continent.

(A) It was brought to Europe

(B) Bringing to Europe

(C) Brought to Europe

(D) When it brought to Europe

4. Seldom _____ a total solar eclipse from the same place twice in a lifetime.

(A) people see

(B) do people see

(C) people do see

(D) seeing people

5. The Panama Canal, _____ in 1914, allows ships to avoid the long voyage around South America.

(A) it was opened

(B) was opened

(C) opened it

(D) which opened

6. The farther a planet is from the Sun, _____ it takes to complete one orbit.

(A) longer
(B) the longer
(C) the longest
(D) longer than

Written Expression

Directions: Identify the one underlined word or phrase that must be changed for the sentence to be correct.

7. The number$_{A}$ of international students in the United States have$_{B}$ grown considerably$_{C}$ over the past seven$_{D}$ decades.

8. Neither the professor nor the students was$_{A}$ able to explain$_{B}$ why$_{C}$ the experiment had failed$_{D}$.

9. The rapid growth of cities in the nineteenth century created$_{A}$ problems such as overcrowding, disease, and air$_{B}$ polluted$_{C}$, which affected millions$_{D}$ of people.

10. Unlike most substances, water expands$_{A}$ when it freezes$_{B}$, which is why$_{C}$ ice floats in top of$_{D}$ liquid water.

11. Archaeologists believe that$_{A}$ the city of Teotihuacan was$_{B}$ home to more than$_{C}$ 100,000 people at it's$_{D}$ peak.

12. The earliest known world map, which was drawn$_{A}$ on a clay tablet in ancient Babylon, places$_{B}$ the city at the center of a flat, circular world surround$_{C}$ by water$_{D}$.

Estrategias para el día del examen

- **Ritmo.** Structure: unos 37 segundos por reactivo. Reading: 11 minutos por texto; revisa el reloj a los 11, 22, 33 y 44 minutos. En Listening el ritmo lo marca el audio.
- **Nunca en blanco.** No hay castigo por error. Usa el último minuto de cada sección para llenar las que falten.
- **Listening.** Responde en cuanto escuches la pregunta y usa el tiempo que sobra para leer las opciones del siguiente reactivo.
- **Structure.** Primero sujeto y verbo. En Written Expression, recorre la lista de 10 errores.
- **Reading.** Si te atoras, marca una opción y sigue. Con poco tiempo, responde primero vocabulario y referencia.
- **Logística.** Identificación oficial (confirma cuál aceptan), lápiz y goma si el examen es en papel,

y llega 30 minutos antes. La noche anterior, duerme en lugar de estudiar.

Mi plan para los días que faltan

1. Mi sección más débil y cuántos minutos diarios le voy a dedicar:

   _____

2. Mis dos errores más frecuentes y la regla que corrige cada uno:

   _____

   _____

3. El día y la hora de mi siguiente práctica con reloj:

   _____

Bitácora y hoja de análisis

Bitácora de errores

Cópiala en tu cuaderno o en una hoja de cálculo: una fila por cada error, el mismo día. Si no puedes escribir la regla, todavía no entendiste el error.

1. Fecha
2. Sección
3. Reactivo
4. Tipo de error
5. Por qué me equivoqué
6. Regla o estrategia correcta

> **Ejemplo**
> Structure · Inversión
> Por qué: no vi que never estaba al inicio.
> Regla: never al inicio → auxiliar + sujeto.

Tipos de error: los 6 patrones de Structure y los 10 errores de Written Expression (Sesión 1), las 8 trampas de Part A (Sesión 2) y los 8 tipos de pregunta de Reading (Sesión 3). En Parts B y C de Listening usa los tipos de Reading: idea principal, detalle o inferencia.

Hoja de análisis del simulacro

Sección	Aciertos	Puntaje
